Purchasing your own trap.

Many feed stores and hardware stores sell humane traps. We recommend buying Tru-Catch traps. These have ring closures instead of springs. This makes them both safer and quieter. The cheaper spring-based traps make a loud slapping sound when triggered and many cats will avoid going into one if they hear one go off or accidentally spring it themselves while investigating the trap. Trappers often refer to these as "silver slappies". Occasionally, a cat will be injured when their tail or leg gets caught by the spring door of this type of trap. www.trucatchtraps.com \$50 - \$100.
